INDEX TO VOLUME XXVII

AUTHORS

PAGE

Adams, G. A. (See C. V. Lusena).... 186
Ajemian, Edward P. (See James B. Allison)..... 495
Alcock, A. W. William Findlay Geddes and his work (Osborne medalist, 1950).....27: No. 6, Suppl.
Allison, James B., John I. White, Edward P. Ajemian, and Jay S. Roth. The effects of chlorine dioxide on the nutritive value of wheat gluten..... 495
Anderson, J. A. (See D. K. Cunningham)..... 344
—— (See G. N. Irvine)..... 367
Anderson, R. A. (See R. L. Zipf).... 463
Anderson, Ruth B. (See K. F. Finney) 312
Arnold, Aaron, and Frans C. Goble. Studies with dogs fed flour treated with ammonium persulfate..... 375

Bachmann, R. C. (See R. J. Dimler). 488
Baird, Peggy D., M. M. MacMasters, and C. E. Rist. Studies on a rapid test for the viability of corn for industrial use..... 508
Bennett, Edmond H. Kernel hardness in corn I. A machine for the rapid determination of kernel hardness... 222
——. —— II. A microscopic examination of hard and soft types of dent corn..... 232
Berquist, C. B. (See E. C. Edelmann). 1
Bethke, R. M. (See Charles H. Hunt) 79, 149, 157, 342
—— (See Lorraine D. Rodriguez)... 67
Bode, C. E. (See K. F. Finney)..... 312
Bottomly, R. A., Clyde M. Christensen, and W. F. Geddes. Grain storage studies IX. The influence of various temperatures, humidities, and oxygen concentrations on mold growth and biochemical changes in stored yellow corn..... 271
Bradley, W. B., and J. B. Thompson. The effect of crust on changes in crumbliness and compressibility of bread crumb during staling..... 331
Briggs, D. R., and Robert L. Mann. An electrophoretic analysis of soybean protein..... 243
—— (See Robert L. Mann)..... 258
Burkert, George M. (See Victor L. Erlich)..... 423

Carson, B. G., L. F. Marnett, and R. W. Selman. Polyoxyethylene monostearate as an anti-staling adjunct in bread..... 438
Cathcart, W. H. (See E. C. Edelmann) 1

PAGE

Choi, R. P., C. W. Tatter, and C. M. O'Malley. A method for the determination of lactose in bread..... 398
Christensen, Clyde M., and Mortimer Cohen. Numbers, Kinds, and source of molds in flour..... 178
—— (See R. A. Bottomley)..... 271
Cohen, Mortimer. (See Clyde M. Christensen)..... 178
Conn, James F., J. A. Johnson, and B. S. Miller. An investigation of commercial fungal and bacterial alpha-amylase preparations in baking..... 191
Conn, John B., C. M. Hollenbeck, Charles Rosenblum, and D. T. Woodbury. The decomposition of potassium iodate during the baking of bread..... 296
Corman, Julian. (See Henry M. Tsuchiya)..... 322
Crossland, L. B., and H. H. Favor. A study of the effects of various techniques on the measurement of the firmness of bread by the Baker Compressimeter..... 15
Cunningham, D. K., and J. A. Anderson. Communication to the editor. Preparation of "gluten" from barley and rye..... 344

Davis, H. A. (See R. J. Dimler)..... 488
Dimler, R. J., R. C. Bachmann, and H. A. Davis. Improved techniques for study of the hydrolysis of amylose by malt alpha-amylase..... 488
Dodge, W. W. (See Max Milner)... 501
Doty, J. M., and R. C. Sherwood. Experiments with ammonium persulfate as a flour maturing agent..... 409
Dowdle, R. L. (See Oscar Skovholt). 26

Earle, F. R. (See J. E. Hubbard).... 415
Edelmann, E. C., W. H. Cathcart, and C. B. Berquist. The effect of various ingredients on the rate of firming of bread crumb in the presence of polyoxyethylene (mono) stearate and glyceryl monostearate. 1
Elder, Angeline H. (See James W. Pence).....60, 335
Erlich, Victor L., and George M. Burkert. Beta-amylase activities of barley, wheat, and rye..... 423

Favor, H. H. (See L. B. Crossland). 15
Fifield, C. C., Ray Weaver, and J. F. Hayes. Bread loaf volume and protein content of hard red spring wheats..... 383

Finney, K. F., C. E. Bode, W. T. Yamazaki, Mary T. Swickard, and Ruth B. Anderson. Baking properties and palatability studies of soy flour in blends with hard winter wheat flour 312
——, **V. H. Morris, and W. T. Yamazaki.** Micro versus macro cookie baking procedures for evalutating the cookie quality of wheat varieties. 42
——, **W. T. Yamazaki, and V. H. Morris.** Effects of varying quantities of sugar, shortening, and ammonium bicarbonate on the spreading and top grain of sugar-snap cookies 30
Foster, Joseph F., Jen Tsi Yang, and N. Henry Yui. Extraction and electrophoretic analysis of the proteins of corn 477
Frediani, H. A. (See Chester R. Szalkowski) 140

Geddes, W. F. Book review: Chemical engineers' handbook. 3rd ed., ed. by John H. Perry 346
—— Cereal chemistry at the mid-century (Osborne Medal Address, 1950) **27**: No. 6, Suppl.
—— (See R. A. Bottomley) 271
Goble, Frans C. (See Aaron Arnold) . 375

Hall, H. H. (See J. E. Hubbard) 415
Hayes, J. F. (See C. C. Fifield) 383
Hollenbeck, C. M. (See John B. Conn) 296
Hubbard, J. E., H. H. Hall, and F. R. Earle. Composition of the component parts of the sorghum kernel ... 415
Hunt, Charles H., Lorraine D. Rodriguez, and R. M. Bethke. The environmental and agronomical factors influencing the thiamine, riboflavin, niacin, and pantothenic acid content of wheat, corn, and oats 79
——, ——, and ——. The niacin and pantothenic acid content of certain Ohio corn hybrids 149
——, ——, and ——. The effect of maturity on the niacin and pantothenic acid content of the stalks and leaves, tassels, and grain of four sweet corn varieties 157
——, ——, ——, **and R. C. Thomas.** Communication to the editor. The niacin and pantothenic acid content of normal and moldy corn 342
—— (See Lorraine D. Rodriguez) ... 67

Irvine, G. N., and C. A. Winkler. Factors affecting the color of macaroni II. Kinetic studies of pigment destruction during mixing 205
——, ——, **and J. A. Anderson.** —— III. Varietal differences in the rate of pigment destruction during mixing 367

Johnson, John A. (See J. A. Shellenberger) 162
—— (See James F. Conn) 191
—— (See Max Milner) 358

Koepsell, Harold J. (See Henry M. Tsuchiya) 322

Lakamp, R. C. (See J. A. Shellenberger) 106
Lewis, James C. (See James W. Pence) 335
Loska, Stephen J., Jr., and Daniel Melnick. Laboratory procedure for evaluating the curd-producing capacity of soya products 127
Lusena, C. V. Preparation of dried native wheat gluten 167
——, **and G. A. Adams.** Communication to the editor. Preparation of spray dired wheat gluten 186

MacMasters, M. M. (See M. J. Wolf) 219
—— (See Peggy D. Baird) 508
Mann, Robert L., and D. R. Briggs. Effects of solvent and heat treatment on soybean proteins as evidenced by electrophoretic analysis 258
—— (See D. R. Briggs) 243
Marnett, L. F., and R. W. Selman. Studies of the effects of polyoxyethylene monostearate on flour amylase activity 349
—— (See B. G. Carson) 438
Mecham, Dale K. (See James W. Pence) 60, 335
Meisner, D. F. (See J. B. Thompson). 71
Melnick, Daniel. (See Morris Simon). 114
—— (See Stephen J. Loska, Jr.) 127
Miller, Byron S., Joann Y. Seiffe, J. A. Shellenberger, and G. D. Miller. Amino acid content of various wheat varieties I. Cystine, lysine, methionine, and glutamic acid 96
—— (See J. A. Shellenberger) 162
—— (See J. F. Conn) 191
Miller, G. D. (See Byron S. Miller) .. 96
Milner, Max, and John A. Johnson. The influence of drying temperature and dry ice treatment on the quality of immature wheat 358
——, **and W. W. Dodge.** Influence of bleaching on the absorption spectra of butyl alcohol extracts of wheat flour 501
Morris, V. H. (See K. F. Finney) .. 30, 42

Olcott, Harold S. Communication to the editor. Stabilization of solutions of wheat gluten in dilute acetic acid by brief heat treatment 514
—— (See James W. Pence) 335
O'Malley, C. M. (See R. P. Choi) ... 398

Pence, James W., Angeline H. Elder, and Dale K. Mecham. Preparation of wheat flour pentosans for use in reconstituted doughs 60
——, **Dale K. Mecham, Angeline H. Elder, James C. Lewis, Neva S. Snell, and Harold S. Olcott.** Characterization of wheat gluten. II. Amino acid composition 335
Phillips, W. M. (See J. A. Shellenberger) 162
Price, Stanley A. Communication to the editor. The amino acid composition of whole wheat in relation to its protein content 73

Ramstad, P. E. Book review: Outlines of biochemistry, by Ross Aiken Gortner. 3rd ed., Ross Aiken Gortner, Jr., and Willis Alway Gortner, ed. 75
—— (See A. C. Rice) 238
Redfern, Sutton. An automatic electrical recording pressuremeter 451
Rice, A. C., and P. E. Ramstad. Amino acid compositions of wheat and carob glutens 238
Rist, C. E. (See Peggy D. Baird) 508
—— (See M. J. Wolf) 219
Rodriguez, Lorraine D., Charles H. Hunt, and R. M. Bethke. The protein, niacin, and pantothenic acid contents of corn inbred lines 67
—— (See Charles H. Hunt) 79, 149, 157, 342
Rosenblum, Charles. (See John B. Conn) 296
Rost, C. O. Book review: Advances in agronomy, Vol. 1, ed. by A. G. Norman 345
Roth, Jay S., (See James B. Allison) 495
Roy, D. K., and L. A. Underkofler. Inhibition of beta-amylase by cyanide 404

Schultze, M. O. Book review: A textbook of biochemistry, by Philip H. Mitchell 517
—— Book review: Nutritional data, by H. J. Heinz Co. 75
Seeley, R. D., H. F. Ziegler, Jr., and R. J. Sumner. The nutritional value of white bread containing nonviable dired yeast 50
Seiffe, Joann Y. (See Byron S. Miller) 96
Selman, R. W. (See B. G. Carson) 438
—— (See L. F. Marnett) 349
Shellenberger, J. A., W. M. Phillips, John A. Johnson, and Byron S. Miller. The quality of hard red winter wheat as affected by 2,4-D spray applications 162
——, **F. W. Wichser, and R. C. Lakamp.** Cake properties in relation to flour particle size fractions 106
—— (See Byron S. Miller) 96
Sherwood, R. C. (See J. M. Doty) 409
Simon, Morris, and Daniel Melnick. The in vitro digestibility of raw and heat-processed soy products varying in the nutritive value of the protein 114
Skovholt, Oscar, and R. L. Dowdle. Changes in the rate of firmness development in bread at different seasons and with the use of emulsifiers 26
Slotter, R. L. (See R. L. Zipf) 463
Smith, F. Book review: A German-English dictionary for chemists, by Austin M. Patterson 517
Snell, Neva S. (See James W. Pence) 335
Sumner, R. J. (See R. D. Seeley) 50
Swickard, Mary T. (See K. F. Finney) 312
Szalkowski, Chester R., and H. A. Frediani. Determination of iron in cereals, flour, and bread 140

Tatter, C. W. (See R. P. Choi) 398
Thompson, J. B., and D. F. Meisner. Communication to the editor. The lever system of the Baker Compressimeter 71
——, (See W. B. Bradley) 331
Thomas, R. C. (See Charles H. Hunt) 342
Tsuchiya, Henry M., Julian Corman, and Harold J. Koepsell. Production of mold amylases in submerged culture. II. Factors affecting the production of alpha-amylase and maltase by certain aspergilli 322

Underkofler, L. A. (See D. K. Roy) 404

Weaver, Ray. (See C. C. Fifield) 383
White, John I. (See James B. Allison) 495
Wichser, F. W. (See J. A. Shellenberger) 106
Winkler, C. A. (See G. N. Irvine) 205, 367
Wolf, M. J., M. M. MacMasters, and C. E. Rist. Some characteristics of the starches of three South American seeds used for food 219
Woodbury, D. E. (See John B. Conn) 296
Wöstmann, B. The cystine content of wheat flour in relation to dough properties 391

Yamazaki, W. T. (See K. F. Finney) 30, 42, 312
Yang, Jen Tsi. (See Joseph F. Foster) 477
Yui, N. Henry. (See Joseph F. Foster) 477

Ziegler, H. F., Jr. (See R. D. Seeley) 50
Zipf, R. L., R. A. Anderson, and R. L. Slotter. Wet milling of grain sorghum 463

SUBJECTS

PAGE

Agene, see Nitrogen trichloride
Alpha-amylase, see Amylases, Alpha
Amino acids
(See also individual amino acids)
In carob gluten (Rice and Ramstad). 238
In various wheat varieties (Miller, Seiffe, Shellenberger, and Miller). 96
In various wheat flours (Pence, Mecham, Elder, Lewis, Snell, and Olcott) 335
In wheat gluten (Rice and Ramstad) 238
In whole wheat (Price) 73
Microbiological assay of wheat proteins (Miller, Seiffe, Shellenberger, and Miller) 96
Ammonium bicarbonate, effect on spreading and top grain of sugar-snap cookies (Finney, Yamazaki, and Morris) 30
Ammonium persulfate
As flour maturing agent, compared with nitrogen trichloride (Doty and Sherwood) 409
Flour treated with, effect on dogs (Arnold and Goble) 375
Amylases
(See also Amylases, Alpha and Amylases, Beta)
Activity
effect of cyanide (Roy and Underkofler) 404
of immature wheat, effect of drying temperature (Milner and Johnson) 358
Inhibitor, cyanide (Roy and Underkofler) 404
Malt, effect of salts on activity of beta fraction (Erlich and Burkert) 423
Amylases, Alpha
Activity, effect of polyoxyethylene monostearate on dextrinization (Marnett and Selman) 349
Bacterial, as flour supplement (Conn, Johnson, and Miller) 191
Fungal
as flour supplement (Conn, Johnson, and Miller) 191
production in submerged culture (Tsuchiya, Corman, and Koepsell) 322
Inhibitor, cyanide (Roy and Underkofler) 404
Malt, for hydrolyzing amylose, effect of temperature (Dimler, Bachmann, and Davis) 488
Production by Aspergilli (Tsuchiya, Corman, and Koepsell) 322
Amylases, Beta
Effect of salts on activity in cereal malts (Erlich and Burkert) 423
In barley activity (Erlich and Burkert) 423
In cereal malts, fractionation (Erlich and Burkert) 423
In rye, activity (Erlich and Burkert) 423

PAGE

Amylases, Beta (Continued)
In wheat, activity (Erlich and Burkert) 423
Inhibitor, cyanide (Roy and Underkofler) 404
Amylose
Hydrolysis by malt alpha-amylase (Dimler, Bachmann, and Davis) 488
Hydrolysate, chromatographic analysis (Dimler, Bachmann, and Davis) 488
Retrogradation, prevention by hydrolyzing at 70° C. (Dimler, Bachmann, and Davis) 488

Bacterial enzyme concentrate, as alpha-amylase supplement (Conn, Johnson, and Miller) 191
Baker Compressimeter
Lever system (Thompson and Meisner) 71
Measuring crumb firmness (Crossland and Favor) 15
Baking tests on soybean-wheat flour blends (Finney, Bode, Yamazaki, Swickard, and Anderson) 312
Barley
Amylase (beta) activity (Erlich and Burkert) 423
Gluten prepared from (Cunningham and Anderson) 344
Benzoyl peroxide, absorption spectra of extracts of flour treated with (Milner and Dodge) 501
Beta-amylase, see Amylase, Beta
Bleaching agents
Absorption spectra of extracts of flour treated with (Milner and Dodge) 501
Chlorine dioxide, effect on nutritive value of wheat gluten (Allison, White, Ajemian, and Roth) 495
Bleaching, Flour
Absorption spectra of extracts (Milner and Dodge) 501
Residual pigment, nature of (Milner and Dodge) 501
With ammonium persulfate, effect on dogs (Arnold and Goble) 375
Book reviews
Advances in agronomy. I., ed by A. G. Norman (Rost) 345
Chemical engineers' handbook, 3rd ed., ed. by John H. Perry (Geddes) 346
A German-English dictionary for chemists, by A. M. Patterson (Smith) 517
Nutritional data, by H. J. Heinz Co. (Schultze) 75
Outlines of biochemistry, by R. A. Gortner, 3rd, ed. by R. A. Gortner, Jr. and W. A. Gortner (Ramstad) 75
A textbook of biochemistry, by Philip M. Mitchell (Schultze) 517

Bread
Effect of bacterial and fungal alpha-amylase supplements (Conn, Johnson, and Miller) ... 191
Iron content, determination (Szalkowski and Frediani) ... 140
Lactose in, determination (Choi, Tatter, and O'Malley) ... 398
Loaf volume, see Loaf volume
Nonfat milk solids in, determination (Choi, Tatter, and O'Malley) ... 398
Nutritive value
comparison of nonfat milk solids and nonviable dried yeast for improving (Seeley, Ziegler, and Sumner) ... 50
improvement with dried yeast and nonfat milk solids (Seeley, Ziegler, and Sumner) ... 50
Bread baking, decomposition of potassium iodate during (Conn, Hollenbeck, Rosenblum, and Woodbury) ... 296
Bread crumb
Effect in the presence of emulsifiers
of lard (Edelmann, Cathcart, and Berquist) ... 1
of nonfat dry milk solids (Edelmann, Cathcart, and Berquist) ... 1
of sodium chloride (Edelmann, Cathcart, and Berquist) ... 1
of sucrose (Edelmann, Cathcart, and Berquist) ... 1
of water (Edelmann, Cathcart, and Berquist) ... 1
of yeast (Edelmann, Cathcart, and Berquist) ... 1
Effect of
emulsifiers on firmness (Skovholt and Dowdle) ... 26
polyoxyethylene monostearate (Carson, Marnett, and Selman) 438
Firmness
methods of measuring (Crossland, and Favor) ... 15
Baker Compressimeter for measuring (Crossland and Favor) ... 15
—— (Thompson and Meisner) ... 71
Moisture migration to crust during staling (Bradley and Thompson) ... 331
Rate of firming at different seasons (Skovholt and Dowdle) ... 26
Bread crumbliness
As staling test (Carson, Marnett, and Selman) ... 438
As tenderness test (Carson, Marnett, and Selman) ... 438
Bread crust, effect on staling (Bradley and Thompson) ... 331
Bread emulsifiers
As antistaling agents (Edelmann, Cathcart, and Berquist) ... 1
Effect on crumb firmness (Skovholt and Dowdle) ... 26
Polyoxyethylene monostearate as anti-staling adjunct (Carson, Marnett, and Selman) ... 438
effect on flour amylase activity (Marnett and Selman) ... 349
Bread staling
Baker Compressimeter for measuring (Crossland and Favor) ... 15

Bread staling (Continued)
Effect of
crust (Bradley and Thompson) ... 331
emulsifiers (Skovhold and Dowdle) 26
glyceryl monostearate (Edelmann, Cathcart, and Berquist) ... 1
polyoxyethylene monostearate on amylase activity (Marnett and and Selman) ... 349
on starch (Marnett and Selman) 349
Methods for measuring (Carson, Marnett, and Selman) ... 438
Moisture migration to crust during (Bradley and Thompson) ... 331
Polyoxyethylene monostearate as inhibitor (Edelmann, Cathcart, and Berquist) ... 1
—— (Carson, Mafnett, and Selman) ... 438
Rates at different seasons (Skovholt and Dowdle) ... 26

Cake flour, relation of quality to particle size (Shellenberger, Wichser, and Lakamp) ... 106
Carbon dioxide, solid, see Dry ice
Carob gluten, amino acid composition (Rice and Ramstad) ... 238
Cereal chemistry at the midcentury (Geddes) ... 27 No. 6 Suppl
Cereals and cereal products
Grain storage tests, corn (Bottomley, Christensen, and Geddes) ... 271
Iron content, determination (Szalkowski and Frediani) ... 140
Research, 1900-50 (Geddes) ... 27 No. 6 Suppl
Chlorine dioxide
Absorption spectra of extracts of flour treated with (Milner and Dodge) ... 501
Effect on nutritive value of wheat gluten (Allison, White, Ajemian, and Roth) ... 495
Chromatography of amylose hydrolysate (Dimler, Bachmann, and Davis) ... 488
Color of macaroni, see Macaroni, color
Cookie flour
Evaluation
comparison of micro and macro procedures (Finney, Morris, and Yamazaki) ... 42
formula for (Finney, Yamazaki, and Morris) ... 30
Cookies, Sugar-snap
Effect on spreading and top grain of ammonium bicarbonate (Finney, Yamazaki, and Morris) ... 30
of sugar (Finney, Yamazaki, and Morris) ... 30
of shortening (Finney, Yamazaki, and Morris) ... 30
Corn
Drying, effect of temperature on milling (Baird, MacMasters, and Rist) ... 508
on viability (Baird, MacMasters, and Rist) ... 508
Endosperm, properties in relation to hardness (Bennett) ... 232

Corn (Continued)
Hardness, relation to kernel structure (Bennett) 232
Hybrids, Ohio, pantothenic acid content (Hunt, Rodriguez, and Bethke) 149
Inbred lines
niacin and pantothenic acid in (Rodriguez, Hunt, and Bethke) 67
protein content (Rodriguez, Hunt, and Bethke) 67
Kernel hardness
machine for testing (Bennett) 222
microscopical examination (Bennett) 232
Meal, iron content determination (Szalkowski and Frediani) 140
Milling effect of drying temperature (Baird, MacMasters, and Rist) .. 508
Niacin content
in normal and moldy (Hunt, Rodriguez, Bethke, and Thomas) 342
in Ohio hybrids (Hunt, Rodriguez, and Bethke) 149
relation to soil treatment (Hunt Rodriguez, and Bethke) 79
Pantothenic acid content
in normal and moldy (Hunt, Rodriguez, Bethke, and Thomas) .. 342
in Ohio hybrids (Hunt, Rodriguez, and Bethke) 149
relation to soil treatment (Hunt, Rodriguez, and Bethke) 79
Proteins
extraction with aqueous detergent solutions (Foster, Yang, and and Yui) 477
electrophoretic analysis (Foster, Yang, and Yui) 477
Riboflavin content, relation to soil treatment (Hunt, Rodriguez, and Bethke) 79
Storage
mold growth (Bottomley, Christensen, and Geddes) 271
temperature, humidity and oxygen concentration studies (Bottomley, Christensen, and Geddes) .. 271
Structural properties, relation to hardness (Bennett) 232
Sweet
niacin content in relation to maturity (Hunt, Rodriguez, and Bethke) 157
pantothenic acid in relation to maturity (Hunt, Rodriguez, and Bethke) 157
Thiamine content, relation to soil treatment (Hunt, Rodriguez, and Bethke) 79
2, 3, 5-Triphenyltetrazolium chloride test for viability (Baird, MacMasters, and Rist) 508
Viability test (Baird, MacMasters, and Rist) 508
Vitamins
Influence of soil treatment (Hunt, Rodriguez, and Bethke) 79
in proteins of inbred lines (Rodriguez, Hunt, and Bethke) 67
Crum, see Bread crumb

Cyanide
Potassium, as flour pigment destruction inhibitor (Irvine, Winkler, and Anderson) 367
Sodium, as amylase inhibitor (Roy and Underkofler) 404
Cystine
In various wheat varieties (Miller, Seiffe, Shellenberger, and Miller). 96
In wheat flour, relation to dough properties (Wöstmann) 391

Detergent solutions for extracting corn proteins (Foster, Yang, and Yui). 477
2, 4-Dichlorophenoxyacetic acid, see Plant growth stimulants
Dough
Effect of wheat flour pentosans (Pence, Elder, and Mecham) 60
Gassing rate, see Gas production in dough
Physical properties, relation to cystine content (Wöstmann) 391
Dry ice, effect on quality of immature wheat (Milner and Johnson) 358

Electrophoretic analysis of soybean protein (Briggs and Mann) 243
—— (Mann and Briggs) 258
Emulsifiers, Bread, See Bread emulsifiers

Fermentation, automatic electrical recording pressuremeter for measuring gas production (Redfern) .. 451
Fertilizers, effect on vitamin content of cereals (Hunt, Rodriguez, and Bethke) 79
Flour
Alpha-Amylase activity, effect of fungal enzyme concentrate (Conn, Johnson, and Miller) 191
Amylases, effect of polyoxyethylene monostearate (Marnett and Selman) 349
Baking quality, relation to cystine content (Wöstmann) 391
Bleaching, see Bleaching flour
Cake, see Cake flour
Cookie, see Cookie flour
Cystine content, relation to dough properties (Wöstmann) 391
Improvers
ammonium persulfate
effect on dogs (Arnold and Goble) 375
experiments with (Doty and Sherwood) 409
chlorine dioxide, effect on nutritive value of gluten (Allison, White, Ajemian, and Roth) 495
comparison of nitrogen trichloride and ammonium persulfate (Doty and Sherwood) 409
potassium iodate, decomposition during baking (Conn, Hollenbeck, Rosenblum, and Woodbury) 296
Iron content, determination (Szalkowski and Frediani) 140
Mold growths, numbers, kinds and source (Christensen and Cohen) .. 178

Flour (Continued)
Maturing agents, see Flour, Improvers
Nutritive value, effect of chlorine dioxide (Allison, White, Ajemian, and Roth) ... 495
Particle size, effect on cake properties (Shellenberger, Wichser, and Lakamp) ... 106
Pentosans, preparation for use in reconstituted dough (Pence, Elder, and Mecham) ... 60
Potassium iodate, decomposition during bread baking (Conn, Hollenbeck, Rosenblum, and Woodbury) ... 296
Protein
cystine content in relation to dough properties (Wöstmann) . 391
relation to loaf volume (Fifield, Weaver, and Hayes) ... 383
Proteinase activity, effect of fungal enzyme concentrate (Conn, Johnson, and Miller) ... 191
Riboflavin, effect of ammonium persulfate (Doty and Sherwood) . 409
Soybean flour additives (Finney, Bode, Yamazaki, Swickard, and Anderson) ... 312
Starch, dextrinization, effect of polyoxyethylene monostearate (Marnett and Selman) ... 349
Storage, effect of ammonium persulfate (Doty and Sherwood) ... 409
Thiamine content, effect of ammonium persulfate (Doty and Sherwood) ... 409
Fungal enzyme concentrate, as alpha-amylase supplements (Conn, Johnson, and Miller) ... 191

Gas production in dough, pressuremeter for measuring (automatic electric recording) (Redfern) ... 451
Geddes, William Findlay and his work (Alcock) ... 27 No. 6, Suppl.
Glutamic acid, in various wheat varieties (Miller, Seiffe, Shellenberger, and Miller) ... 96
Gluten (wheat, unless specifically named)
Acetic acid soultions, stabilizing by heat treatment (Olcott) ... 514
Amino acid composition
of various wheat varieties (Pence, Mecham, Elder, Lewis, Snell, and Olcott) ... 335
of wheat and carob (Rice and Ramstad) ... 238
Barley, preparation (Cunningham and Anderson) ... 344
Carob, amino acid composition (Rice and Ramstad) ... 238
Dispersions,
critical concentrations of interfering salts (Lusena) ... 167
in acetic acid (Lusena) ... 167
Dried
preparation
from acetic acid solutions (Lusena) ... 167
spray drying (Lusena and Adams) ... 186
properties (Lusena) ... 167

Gluten (Continued)
Effect of chlorine dioxide on nutritive value (Allison, White, Ajemian, and Roth) ... 495
From different flours, amino acid composition (Pence, Mecham, Elder, Lewis, Snell, and Olcott) ... 335
Nutritive value, effect of chlorine dioxide (Allison, White, Ajemian, and Roth) ... 495
Quality, index for (Fifield, Weaver, and Hayes) ... 383
Rye, preparation (Cunningham and Anderson) ... 344
Glycerides, mono-, see Monoglycerides
Glyceryl monostearate, effect on rate of bread crumb firming (Edelmann, Cathcart, and Berquist) ... 1
Glycinin of soybean proteins (Briggs and Mann) ... 243
Grains, hardness testing machine (Bennett) ... 222

Hardness
Machine for testing grains (Bennett) 222
Of corn
machine for testing (Bennett) ... 222
microscopical examination (Bennett) ... 232

Iodine, Radioactive, see Radioactive iodine
Iron in cereals and cereal products, determination (Szalkowski and Frediani) ... 140

Lactose in bread, determination (Choi, Tatter, and O'Malley) ... 398
Lard, effect on crumb firmness (Edelmann, Cathcart, and Berquist) .. 1
Loaf volume
Effect of dry ice treatment on immature wheat (Milner and Johnson) ... 358
Relation to protein content of flour (Fifield, Weaver, and Hayes) ... 383
Lysine, in various wheat varieties (Miller, Seiffe, Shellenberger, and Miller) ... 96

Macaroni
Color
factors affecting (Irvine and Winkler) ... 205
—— (Irvine, Winkler, and Anderson) ... 367
Iron content, determination (Szalkowski and Frediani) ... 140
Kinetic studies of pigment destruction during mixing (Irvine and Winkler) ... 205
Pigment destruction
alpha-naphthol inhibitor (Irvine, Winkler, and Anderson) ... 367
cyanide inhibitor (Irvine, Winkler, and Anderson) ... 367
during mixing (Irvine and Winkler) ... 205
varietal differences (Irvine, Winkler, and Anderson) ... 367
Magnesium nitrate, as ashing aid in determining iron in cereals (Szalkowski and Frediani) ... 140

Malt amylases, see Amylases, Malt
Methionine, in various wheat varieties (Miller, Seiffe, Shellenberger, and Miller) 96
Milk, dried nonfat
Effect on crumb firmness (Edelmann, Cathcart, and Berquist) 1
For improving nutritional value of white bread (Seeley, Ziegler, and Sumner) 50
In bread, determination (Choi, Tatter, and O'Malley) 398
Milling of grain sorghum (Zipf, Anderson, and Slotter) 463
Mold amylases, see Amylases, Alpha, fungal
Molds
Growth in stored corn at various temperatures, humidities and oxygen content (Bottomley, Christensen, and Geddes) 271
In flour, numbers, kinds, and sources (Christensen and Cohen) 178
Monoglycerides, vegetable oil, effect on bread crumb firmness (Skovholt and Dowdle) 26

Naphthol, alpha-, as flour pigment destruction inhibitor (Irvine, Winkler, and Anderson) 367
Niacin, see Nicotinic acid
Nicotinic acid
In normal and moldy corn (Hunt, Rodriguez, Bethke, and Thomas) . 342
In corn inbred lines (Rodriguez, Hunt, and Bethke) 67
In Ohio hybrid corns (Hunt, Rodriguez, and Bethke) 149
Nitrogen trichloride, absorption spectra of extracts of flour treated with (Milner and Dodge) 501
Nutritive value
Of flour bleached with chlorine dioxide (Allison, White, Ajemian, and Roth) 495
Of soybean products (Simon and Melnick) 114
Of white bread containing nonviable dried yeast (Seeley, Siegler, and Sumner) 50

Oats
Niacin content (Hunt, Rodriguez, and Bethke) 79
Thiamine content (Hunt, Rodriguez, and Bethke) 79
Pantothenic acid content (Hunt, Rodriguez, and Bethke) 79
Riboflavin content (Hunt, Rodriguez, and Bethke) 79
Vitamin content, effect of soil treatment (Hunt, Rodriguez, and Bethke) 79
Osborne medal award, to William Findlay Geddes (1950) ..... 27, No. 6, Suppl.

Pantothenic acid
In cereals, effect of soil treatment (Hunt, Rodriguez, and Bethke) .. 79
In corn
inbred lines (Rodriguez, Hunt, and Bethke) 67
***Pantothenic acid* (*Continued*)**
normal and moldy (Hunt, Rodriguez, Bethke, and Thomas) 342
Ohio hybrids (Hunt, Rodriguez, and Bethke) 149
Pentosans
Effect on dough properties (Pence, Elder, and Mecham) 60
Separation from wheat flour (Pence, Elder, and Mecham) 60
Pigments
In durum wheat
destruction
during mixing (Irvine, Winkler, and Anderson) 367
inhibitors (Irvine, Winkler, and Anderson) 367
in flour after bleaching, nature of (Milner and Dodge) 501
Plant growth stimulants, 2,4-dichlorophenoxyacetic acid esters, effect on hard red winter wheat quality (Shellenberger, Phillips, Johnson, and Miller) 162
Platt machine, see Baker Compressimeter
Poems, see Polyoxyethylene monostearate
Potassium iodate
Decomposition during bread baking (Conn, Hollenbeck, Rosenblum, and Woodbury) 296
Determining decomposition in bread by radioactive iodine (Conn, Hollenbeck, Rosenblum, and Woodbury) 296
Polyoxyethylene monostearate
As antistaling adjunct in bread (Carson, Marnett, and Selman) .. 438
Effect on
bread crumb firmness (Skovholt and Dowdle) 26
flour amylase activity (Marnett and Selman) 349
rate of bread crumb firming (Edelmann, Cathcart, and Berquist) 1
starch dextrinization (Marnett and Selman) 349
Pressuremeter, electrical recording (Redfern) 451
Proteins
Corn
extraction with aqueous detergent solutions (Foster, Yang, and Yui) 477
inbred lines (Rodriguez, Hunt, and Bethke) 67
solubility in aqueous detergent solutions (Foster, Yang, and Yui) 477
Extraction with aqueous detergent solutions (Foster, Yang, and Yui) . 477
Soybean
electrophoretic analysis (Briggs and Mann) 243
—— (Mann and Briggs) 258
nutritive value of raw and heat-processed (Simon and Melnick) . 114
Wheat
effect on loaf volume (Fifield, Weaver, and Hayes) 383

Proteins (Continued)
in relation to amino acid composition (Price) ... 73
Proteinase activity
Of flour supplemented with alpha-amylase (Conn, Johnson, and Miller) ... 191
Of fungal and bacterial alpha-amylase preparations (Conn, Johnson, and Miller) ... 191

Radioactive iodine (I^{131}) as tracer for following decomposition of potassium iodate during bread baking (Conn, Hollenbeck, Rosenblum, and Woodbury) ... 296
Riboflavin
In cereals, effect of soil treatment (Hunt, Rodriguez, and Bethke) .. 79
In flour, effect of ammonium persulfate (Doty and Sherwood) 409
Rye
Amylase (beta) activity (Erlich and Burkert) ... 423
Gluten prepared from (Cunningham and Anderson) ... 344

Salt, see Sodium chloride
Semolina, destruction of pigment during mixing (Irvine and Winkler) . 205
Shortening, effect on spreading and top grain of sugar-snap cookies (Finney, Yamazaki, and Morris) 30
Sorghum
Composition
bran (Hubbard, Hall, and Earle) . 415
endosperm (Hubbard, Hall, and Earle) ... 415
germ (Hubbard, Hall, and Earle) ... 415
of various fractions (Hubbard, Hall, and Earle) ... 415

CONTENTS

Number 1, January, 1950

The Effect of Various Ingredients on the Rate of Firming of Bread Crumb in the Presence of Polyoxyethylene (Mono) Stearate and Glyceryl Monostearate. *E. C. Edelmann, W. H. Cathcart, and C. B. Berquist* 1

A Study of the Effects of Various Techniques on the Measurement of the Firmness of Bread by the Baker Compressimeter. *L. B. Crossland and H. H. Favor* 15

Changes in the Rate of Firmness Development in Bread at Different Seasons and with the Use of Emulsifiers. *Oscar Skovholt and R. L. Dowdle* 26

Effects of Varying Quantities of Sugar, Shortening, and Ammonium Bicarbonate on the Spreading and Top Grain of Sugar-Snap Cookies. *K. F. Finney, W. T. Yamazaki, and V. H. Morris* .. 30

Micro Versus Macro Cookie Baking Procedures for Evaluating the Cookie Quality of Wheat Varieties. *K. F. Finney, V. H. Morris, and W. T. Yamazaki* 42

The Nutritional Value of White Bread Containing Nonviable Dried Yeast. *R. D. Seeley, H. F. Ziegler, Jr., and R. J. Sumner* 50

Preparation of Wheat Flour Pentosans for Use in Reconstituted Doughs. *J. W. Pence, Angeline H. Elder, and D. K. Mecham* .. 60

The Protein, Niacin, and Pantothenic Acid Contents of Corn Inbred Lines. *Lorraine D. Rodriguez, Charles H. Hunt, and R. M. Bethke* 67

Communication to the Editor. The Lever System of the Baker Compressimeter. *J. B. Thompson and D. F. Meisner* 71

Communication to the Editor. The Amino Acid Composition of Whole Wheat in Relation to its Protein Content. *Stanly A. Price* 73

Book Reviews 75

Number 2, March, 1950

The Environmental and Agronomical Factors Influencing the Thiamine, Riboflavin, Niacin, and Pantothenic Acid Content of Wheat, Corn, and Oats. *Charles H. Hunt, Lorraine D. Rodriguez and R. M. Bethke* 79

Amino Acid Content of Various Wheat Varieties. I. Cystine, Lysine, Methionine, and Glutamic Acid. *Byron S. Miller, Joann Y. Seiffe, J. A. Shellenberger, and G. D. Miller* 96
Cake Properties in Relation to Flour Particle Size Fractions. *J. A. Shellenberger, F. W. Wichser, and R. C. Lakamp* 106
The *In Vitro* Digestibility of Raw and Heat-Processed Soy Products Varying in the Nutritive Value of the Protein. *Morris Simon and Daniel Melnick* 114
Laboratory Procedure for Evaluating the Curd-Producing Capacity of Soya Products. *Stephen J. Loska, Jr., and Daniel Melnick* 127
Determination of Iron in Cereals, Flour, and Bread. *Chester R. Szalkowski with H. A. Frediani* 140
The Niacin and Pantothenic Acid Content of Certain Ohio Corn Hybrids. *Charles H. Hunt, Lorraine D. Rodriguez, and R. M. Bethke* 149
The Effect of Maturity on the Niacin and Pantothenic Acid Content of the Stalks and Leaves, Tassels, and Grain of Four Sweet Corn Varieties. *Charles H. Hunt, Lorraine D. Rodriguez and R. M. Bethke* 157
The Quality of Hard Red Winter Wheat as Affected by 2,4-D Spray Application. *J. A. Shellenberger, W. M. Phillips, John A. Johnson, and Byron S. Miller* 162
Preparation of Dried Native Wheat Gluten. *C. V. Lusena* 167
Numbers, Kinds, and Source of Molds in Flour. *Clyde M. Christensen, and Mortimer Cohen* 178
Communication to the Editor. Preparation of Spray Dried Wheat Gluten. *C. V. Lusena and G. A. Adams* 186

NUMBER 3, MAY, 1950

An Investigation of Commercial Fungal and Bacterial Alpha-Amylase Preparations in Baking. *J. F. Conn, J. A. Johnson, and B. S. Miller* 191
Factors Affecting the Color of Macaroni. II. Kinetic Studies of Pigment Destruction During Mixing. *G. N. Irvine and C. A. Winkler* 205
Some Characteristics of the Starches of Three South American Seeds Used for Food. *M. J. Wolf, M. M. MacMasters, and C. E. Rist* 219
Kernel Hardness in Corn. I. A Machine for the Rapid Determination of Kernel Hardness. *Edmond H. Bennett* 222
Kernel Hardness in Corn. II. A Microscopic Examination of Hard and Soft Types of Dent Corn. *Edmond H. Bennett* 232

Amino Acid Compositions of Wheat and Carob Glutens. *A. C. Rice and P. E. Ramstad* 238
An Electrophoretic Analysis of Soybean Protein. *D. R. Briggs and Robert L. Mann* 243
Effects of Solvent and Heat Treatments on Soybean Proteins as Evidenced by Electrophoretic Analysis. *Robert L. Mann and D. R. Briggs* 258

NUMBER 4, JULY, 1950

Grain Storage Studies IX. The Influence of Various Temperatures, Humidities, and Oxygen Concentrations on Mold Growth and Biochemical Changes in Stored Yellow Corn. *R. A. Bottomley, Clyde M. Christensen, and W. F. Geddes* 271
The Decomposition of Potassium Iodate During the Baking of Bread. *John B. Conn, C. M. Hollenbeck, Charles Rosenblum, and D. T. Woodbury* 296
Baking Properties and Palatability Studies of Soy Flour in Blends with Hard Winter Wheat Flour. *K. F. Finney, C. E. Bode, W. T. Yamazaki, Mary T. Swickard, and Ruth B. Anderson* 312
Production of Mold Amylases in Submerged Culture II. Factors Affecting the Production of Alpha-Amylase and Maltase by Certain Aspergilli. *Henry M. Tsuchiya, Julian Corman, and Harold J. Koepsell* 322
The Effect of Crust on Changes in Crumbliness and Compressibility of Bread Curmb During Staling. *W. B. Bradley and J. B. Thompson* 331
Characterization of Wheat Gluten II. Amino Acid Composition *James W. Pence, Dale K. Mecham, Angeline H. Elder, James C. Lewis, Neva S. Snell, and Harold S. Olcott* 335
Communication to the Editor. The Niacin and Pantothenic Acid Content of Normal and Moldy Corn. *Chas. H. Hunt, Lorraine D. Rodriguez, R. M. Bethke, and R. C. Thomas* 342
Communication to the Editor. Preparation of "Gluten" from Barley and Rye. *D. K. Cunningham and J. A. Anderson* 344
Book Reviews 345

NUMBER 5, SEPTEMBER, 1950

Studies of the Effects of Polyoxyethylene Monostearate on Flour Amylase Activity. *L. F. Marnett and R. W. Selman* 349
The Influence of Drying Temperature and Dry Ice Treatment on the Quality of Immature Wheat. *Max Milner and John A. Johnson* 358

Factors Affecting the Color of Macaroni III. Varietal Differences in the Rate of Pigment Destruction During Mixing. *G. N. Irvine, C. A. Winkler and J. A. Anderson* 367
Studies with Dogs Fed Flour Treated with Ammonium Persulfate. *Aaron Arnold and Frans C. Goble* 375
Bread Loaf Volume and Protein Content of Hard Red Spring Wheats. *C. C. Fifield, Ray Weaver, and J. F. Hayes* 383
The Cystine Content of Wheat Flour in Relation to Dough Properties. *B. Wöstmann* 391
A Method for the Determination of Lactose in Bread. *R. P. Choi, C. W. Tatter, and C. M. O'Malley* 398
Inhibition of Beta-Amylase by Cyanide. *D. K. Roy and L. A. Underkofler* 404
Experiments with Ammonium Persulfate as a Flour Maturing Agent. *J. M. Doty and R. C. Sherwood* 409
Composition of the Component Parts of the Sorghum Kernel. *J. E. Hubbard, H. H. Hall, and F. R. Earle* 415

NUMBER 6, NOVEMBER, 1950

Beta-Amylase Activities of Barley, Wheat, and Rye. *Victor L. Erlich and George M. Burkert* 423
Polyoxyethylene Monostearate as an Anti-Staling Adjunct in Bread. *B. G. Carson, L. F. Marnett and R. W. Selman* 438
An Automatic Electrical Recording Pressuremeter. *Sutton Redfern* 451
Wet Milling of Grain Sorghum. *R. L. Zipf, R. A. Anderson, and R. L. Slotter* 463
Extraction and Electrophoretic Analysis of the Proteins of Corn. *Joseph F. Foster, Jen Tsi Yang, and N. Henry Yui* 477
Improved Techniques for Study of the Hydrolysis of Amylose by Malt Alpha-Amylase. *R. J. Dimler, R. C. Bachmann and H. A. Davis* 488
The Effects of Chlorine Dioxide on the Nutritive Value of Wheat Gluten. *James B. Allison, John I. White, Edward P. Ajemian, and Jay S. Roth* 495
Influence of Bleaching on the Absorption Spectra of Butyl Alcohol Extracts of Wheat Flour. *Max Milner and W. W. Dodge* 501
Studies on a Rapid Test for the Viability of Corn for Industrial Use *Peggy D. Baird, M. M. MacMasters, and C. E. Rist* 508
Communication to the Editor. Stabilization of Wheat Gluten in Dilute Acetic Acid by Brief Heat Treatment. *Harold S. Olcott* 514
Book Reviews 517
